DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 3,4,16,17,28, drawn to a carriage and bogie system, classified in class 414, subclass 268.
 - II. Claims 2,5-15,27, drawn to a carriage system, classified in class 414, subclass 277.
 - III. Claims 24-26, drawn to an automated carriage system, classified in class 414, subclass 273.
 - IV. Claim 1 drawn to a carriage, classified in class 414, subclass 268.
 - V. Claims 18-23, drawn to carriage guide structure, classified in class 414, subclass 520.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II-V are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because the combination can be used without the specific subcombinations. The subcombination has separate utility such as II,III,IV in a rail system, per se and V for loading other vehicles..

Art Unit: 3652

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II-V, restriction for examination purposes as indicated is proper.
